Skydiving, one of the most exhilarating of sports is now available in Alvor, Algarve all year round.

The jump zone is the Alvor aerodrome, beautifully sandwiched between the magnificent Algarve coastline and the majestic Monchique mountain range with views of Cape St. Vincent in one direction and Spain in the other.

The Algarve is the warmest jump site in Europe in winter and offers the perfect skydiving holiday year round with its clear skies, beautiful beaches, breathtaking countryside and delectable cuisine. The Alvor aerodrome has qualified instructors and modern jump equipment you need to practice this sport.

The tandem jump.

After a brief instruction we fly you up to 4000metres where you will be harnessed to one of our professional instructors. As you make your jump, you then freefall for a good 50 seconds before the parachute opens and you get what undoubtedly will be one of the most breathtaking views you'll ever witness en-route to the drop zone at the aerodrome. Your whole adventure can also be filmed and edited upon request so that you may never forget one exhilarating second of it.
